WELCOME TO YOUR NEW KITCHEN

The Kitchen is the most important room in your house, and one of the biggest investments you will ever make into your home.

Professional design, quality products, expert installation & market-leading project management are all vital elements to ensure that your new project looks amazing.

We design, supply & install for busy homeowners who need a simple process without the hassle of vetting tradesmen and managing a project. Arrange a home visit!

L Chapman

Laurence Chapman

OUR STORY

Laurence Joseph started recently as an interior design studio, but it soon became clear that kitchens were on many customer's wish list. We felt that enhancing other areas of the home without designing the kitchen was a problem. Now we offer kitchens with timeless designs, backed with the complete end-to-end service including design, supply and installation. Along with this we can also manage the entire project to include other trades - so your tiling, flooring and other decorating is all taken care of by us.

LAURENCE
 JOSEPH

KITCHENS

OUR JOURNEY

We realised that it's very easy to fall in love with your dream kitchen in a vast showroom with its artificial lights. It's also very easy to pay over the odds for a kitchen without really visualising how it will look (and more importantly work) in your home.

Laurence Joseph Kitchens will give you a free design and really get to know you and understand your needs. We provide 3D renders so you can see how your new kitchen will actually look in your home. It is a personal service you won't get from high street retailers. We strive for 100% customer satisfaction, which is why we work with you through your journey, making sure you have a seamless transition to your dream kitchen

SUPPORTING YOU

We know that a new kitchen is a big investment, and that you didn't just wake up and decided you needed a new kitchen. These decisions can take months or years, which is why we are painstaking in our approach. We avoid mistakes by accurately surveying the kitchen, listening to you and offering advice where needed. The kitchen project is properly managed and if anything goes wrong along the way, we will be there to put it right. You are at the heart of your new kitchen.

IF YOU ARE SELLING YOUR HOME

If you are selling your home and feel that replacing the kitchen can add value and appeal, now is the time to do it. We will create a neutral design that will appeal to potential buyers of your property. If you have inherited a home and are listing it with all furniture removed, a potential buyer's opinion will be based on the kitchen alone, which means this one area becomes the main selling point of the property.

PEACE OF MIND

I want to assure you that you can trust us to deliver a great result. Any project can present a challenge no matter how big or small but it is up to us to handle these challenges for you.

Having been responsible for running construction and home improvement projects for many years, I understand how important having an accountable project manager is to achieving the very best client experience.

Listening to and understanding the ideas of my customers and transforming their vision into tangible reality is something that sets us apart from others. Taking an early thought and creating something genuinely special makes my job thoroughly enjoyable.

My team and I have been working together for many years now and we all know what it means to a client when we deliver a successful installation project.

The systems, processes and technology we have invested in to manage our customers projects are industry leading which enables us to deliver a level of service that our customers truly deserve.

You will benefit from a completely digital process that all the detail from the initial design and quotation stage is not lost in the construction and installation phase. You will be presented with designs, plans and images that will truly represent the final outcome and not something dreamt up by a salesperson

I really hope that this demonstrates to you the level of service we strive to achieve and that you can put your trust in us with your project.

L Chapman

Laurence Chapman

YOUR JOURNEY TO YOUR DREAM KITCHEN

STEP 1: ALL IN THE DETAIL

Step 1 is all about getting the details right. We will meet with you at your home, understand how you intend to use the space and understand everything that is important to you, take down the dimensions, and together do some initial planning.

STEP 2: GUIDE PRICE

Using all the information gathered at our first meeting, we will put together a simple design and calculate a guide price based on the first survey. We will send you a quick video and information pack to explain everything.

STEP 3: DESIGN CONSULTATION AND FINAL QUOTE

Taking your ideas forward from our initial meeting, we will meet with you to finesse your thoughts and to create your plans and images if needed. After we have finalised and confirmed everything that you need we will present your final quote and proposal.

STEP 4: BOOK IN YOUR PROJECT START DATE

Once the quote and costings are confirmed, we will finalise any paperwork and send your proposal for you to agree and sign, then we can get a date in the diary once your deposit has been paid.

SINKS

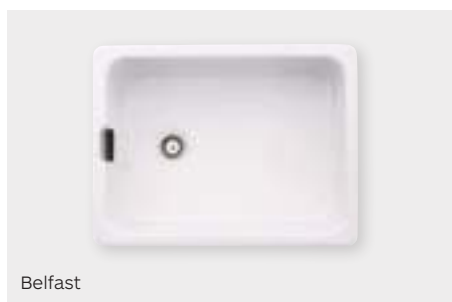

Our sinks offer a choice of finish, colour and design depending on your worktop choice. Single bowls offer more washing space and simple lines while one and a half bowl designs have added practicality.

MILFORD 1.5 BOWL

CERAMIC SINKS

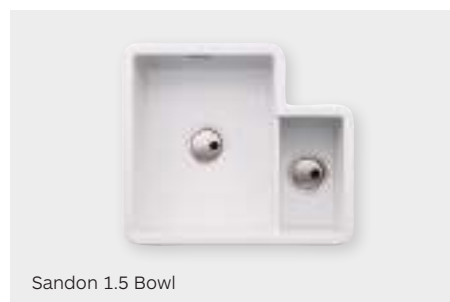

Hygienic with crisp lines, ceramic sinks are particularly popular in traditional kitchens.

38MM LAMINATE WORKTOPS

When it comes to choosing worktop materials, you've got great options available for you to consider: laminate, compact laminate, composite, and quartz. Laminate is a budget-friendly choice that comes in a variety of colours and designs, making it easy to match with your kitchen decor. Compact laminate is ultra-durable and scratch-resistant, perfect for busy kitchens where spills and messes are common. Composite worktops are made from a blend of natural materials and resins, giving them a unique appearance and high durability. Quartz worktops are known for their luxurious look and feel, as well as their resistance to stains and scratches. Each material has its own benefits, so make sure to speak with us about your specific needs and preferences so we can help you find the perfect worktop for your space!
